TITLE : HUMIDITY CONTROLLER AND
PHOTOCATALYTIC DEVICE USING
THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To provide a humidity controller which can control humidity of a gas to be treated by simple constitution and a photocatalytic device which can display high decomposition removing ability by adjusting humidity corresponding to a component to be treated contained in the gas to be treated.

SOLUTION: The humidity controller has a condensation part which condenses and removes moisture in the gas to be treated. Further the photocatalytic device has the humidity controller and a photocatalytic reactor in which the gas to be treated of adjusted humidity is treated by photocatalytic action.
